1.0 GENERAL INFORMATION

1.1 System Overview

*BENE MediCon is a **web-based medicine inventory management system** designed to help healthcare facilities manage their inventory of medicinal supplies or pharmaceutical products. Its main purpose is to:*

- *Track medicine stock levels in **real-time**.*
- *Provide **automatic expiration alerts** to prevent distribution of expired products.*
- *Support **sustainable practices** by promoting the donation, repurposing, or safe disposal of near-expiry medicines.*
- *Improve compliance with **healthcare waste management regulations** and ensure consumer safety.*

*The system uses a **client-server architecture**, accessible via a **web browser** with a graphical user interface (GUI). Users include healthcare staff and administrators, each with different access privileges.*

Responsible Organization: San Beda College Alabang, School of Engineering and Technology.

System Name: BENE MediCon.

Environment: The system requires internet access and a modern web browser. It is optimized for desktops and laptops running Windows 10 or later.

1.2 Project References

This manual is based on the capstone project:

- *Aguiluz, N. A. R., Jarce, M. D. B., & Tumangday, F. M. A. (2025). BENE MediCon: Development of Web-Based Medicine Inventory System for Healthcare Waste Management. San Beda College Alabang.*

1.3 Authorized Use Permission

*The BENE MediCon system is intended for **healthcare facilities and authorized staff only**. Unauthorized access, duplication, or modification of system data, reports, or software is strictly prohibited.*

1.4 Points of Contact

System Developers:

- *Lead Developer – Nicole Aguiluz*
  - *Contact No.: 09495747019*
  - *Email: nicolealexi.aguiluz@gmail.com*
- *Back-End Developer – Marc Jarce*
  - *Contact No.:0969120803*
  - *Email: jarcemarc7@gmail.com*
- *Front-End Developer – Frenz Tumangday*
  - *Email: frenzmarcotumangday@gmail.com*

1.5 Acronyms and Abbreviations

- *GUI – Graphical User Interface*
- *CRUD – Create, Read, Update, Delete*

2.0 SYSTEM SUMMARY

2.1 General Overview

BENE MediCon provides a reliable and sustainable approach to medicine inventory management. It is specifically designed for healthcare facilities to:

- ***Monitor stock levels*** *of medicines in real time.*
- ***Track expiration dates*** *and provide timely alerts for products nearing expiry.*
- ***Promote sustainability*** *through recommendations such as donation, recycling, or safe disposal of unused/expired medicines.*
- ***Support decision-making*** *by generating reports on medicine usage, wastage, and inventory status.*

The system contributes to ***SDG 12 – Responsible Consumption and Production****, ensuring healthcare organizations manage medical supplies effectively and reduce waste.*

2.2 Hardware and Software Specifications

Hardware Requirements (for end-users):

- *Desktop or Laptop (Windows 10, 32/64-bit)*
- *Minimum 4 GB RAM (8 GB recommended)*
- *Stable internet connection*

Software Requirements:

- *Modern web browser (Google Chrome, Mozilla Firefox, Microsoft Edge)*
- *Web server (Apache – via XAMPP)*
- *Database: MySQL (via phpMyAdmin)*
- *Development stack: HTML, CSS, PHP*

2.3 User Access Levels

BENE MediCon defines ***two main user roles****:*

1. ***Healthcare Staff***
    - *Log in using assigned credentials.*
    - *Manage inventory (add, edit, delete medicines).*
    - *Monitor expiration dates and receive alerts.*
    - *Generate and view reports on inventory and waste management.*
2. ***Administrator***
    - *Manage healthcare staff accounts.*
    - *Perform CRUD operations on all inventory records.*
    - *Monitor staff activities and access usage logs.*
    - *Generate system-wide reports and ensure compliance with waste management guidelines.*

3.0 GETTING STARTED

This section provides a general walkthrough of the system from initiation through exit. The logical arrangement of the information shall enable the functional personnel to understand the sequence and flow of the system.

3.1 Logging On

1. *Open a supported web browser.*
2. *Navigate to the **BENE MediCon login page** (https://2022300018-bsit3a.sbca-set3y.site/BENE_Medicon/login.php).*
3. *Enter your **username** and **password** provided by the administrator.*
4. *Click **Log In** to access the system.*

Note: Contact the admin if you do not have an account.

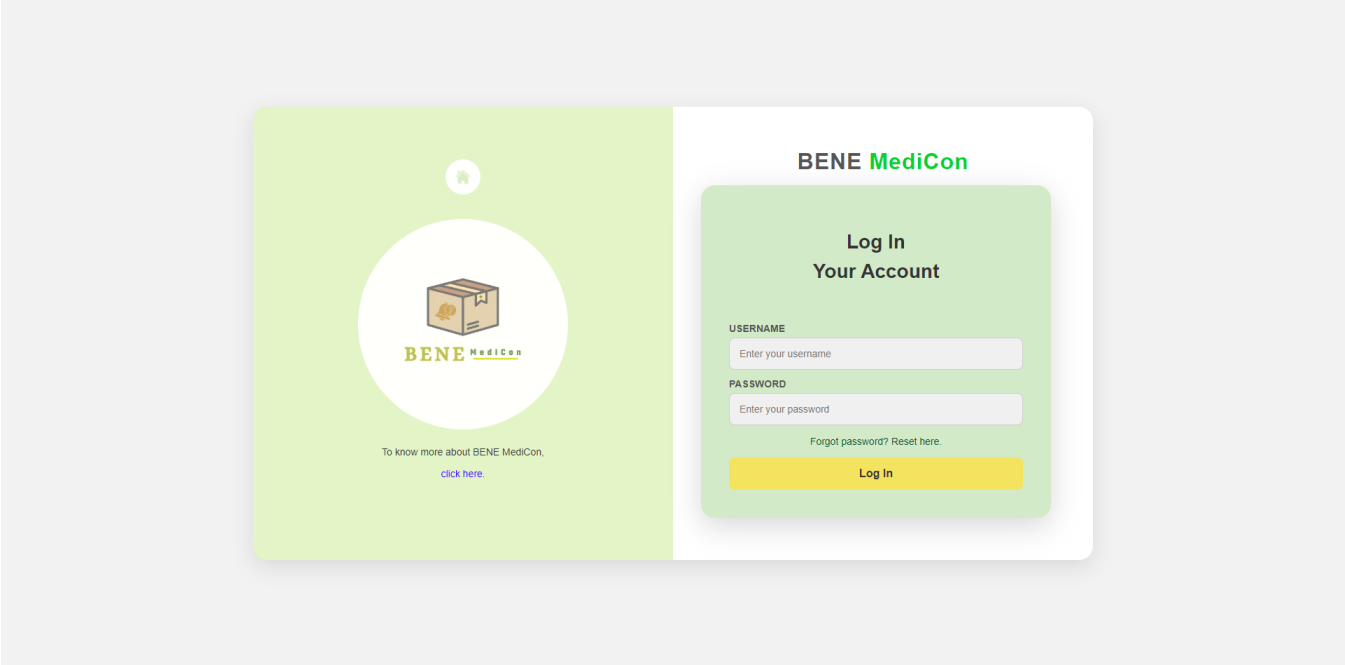

Fig 3.1 – Login Page

3.2 System Menu

*Upon login, users are directed to the **Dashboard**, which includes:*

1. ***Inventory Management** – Add, update, or delete medicine records.*
2. ***Expiration Alerts** – Notifications of medicines nearing expiry.*
3. ***Reports** – Generate reports related to stock and wastage.*

3.4 Exit System

1. *Click the **Profile Icon**.*
2. *Then click the **Logout** button.*

Note: Refer to Fig 3.8

4.0 USING THE SYSTEM

4.1 Inventory Management

- *Navigate to **Inventory → Add Medicine**.*
- *Fill in the required details: Name, Batch Number, Quantity, Expiration Date, Category.*
- *Click **Save**.*
- *The new record will appear in the inventory list.*

Expected Output: Medicine appears in the inventory list with complete details.

Note: Refer to Fig 3.4 – Medicine Inventory Tab

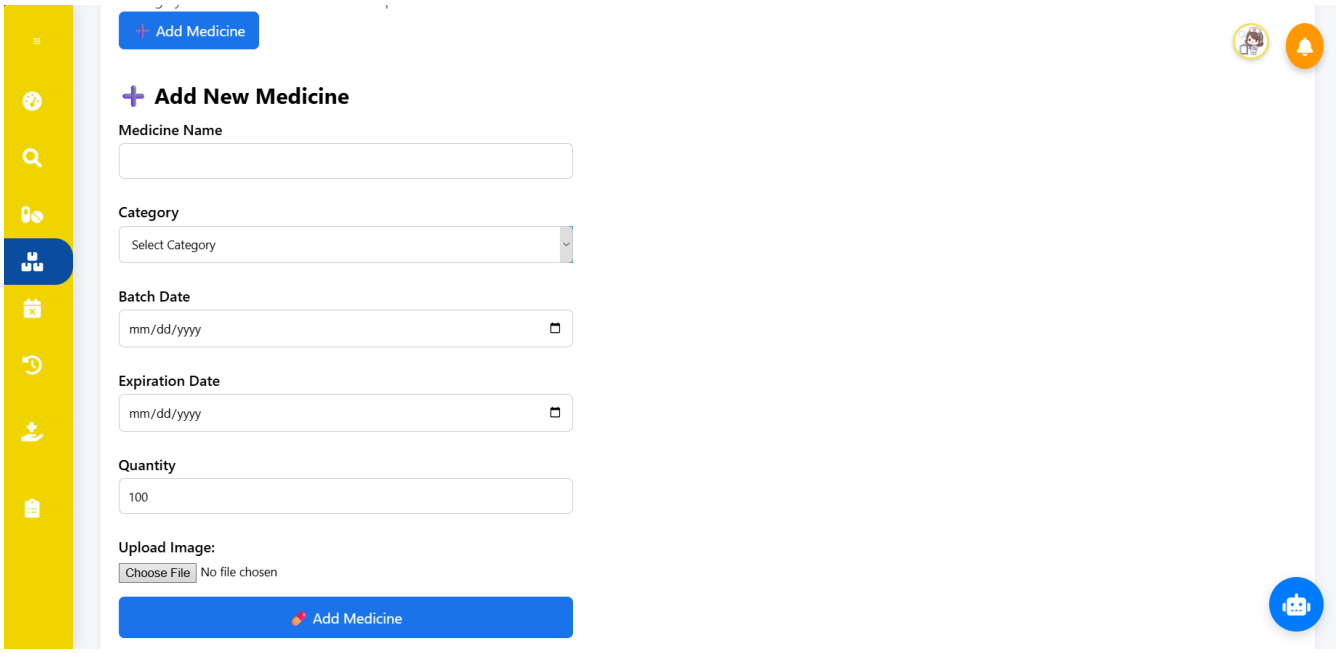

Fig 4.1.1 – Add New Medicine

4.2 Expiration Tracking

- *The system automatically highlights medicines nearing expiration in the **Alerts** section.*
- *Items within **30 days of expiry** are flagged as "Expiring Soon."*
- *Items past expiry are marked "Expired."*

Expected Output: Users receive real-time notifications.

Note: Refer to Fig 3.5 – Expiring Medicines Tab and Fig 3.6 Expired Medicines History Tab

Fig 4.1.2 – Expiring Medicines Tab with records

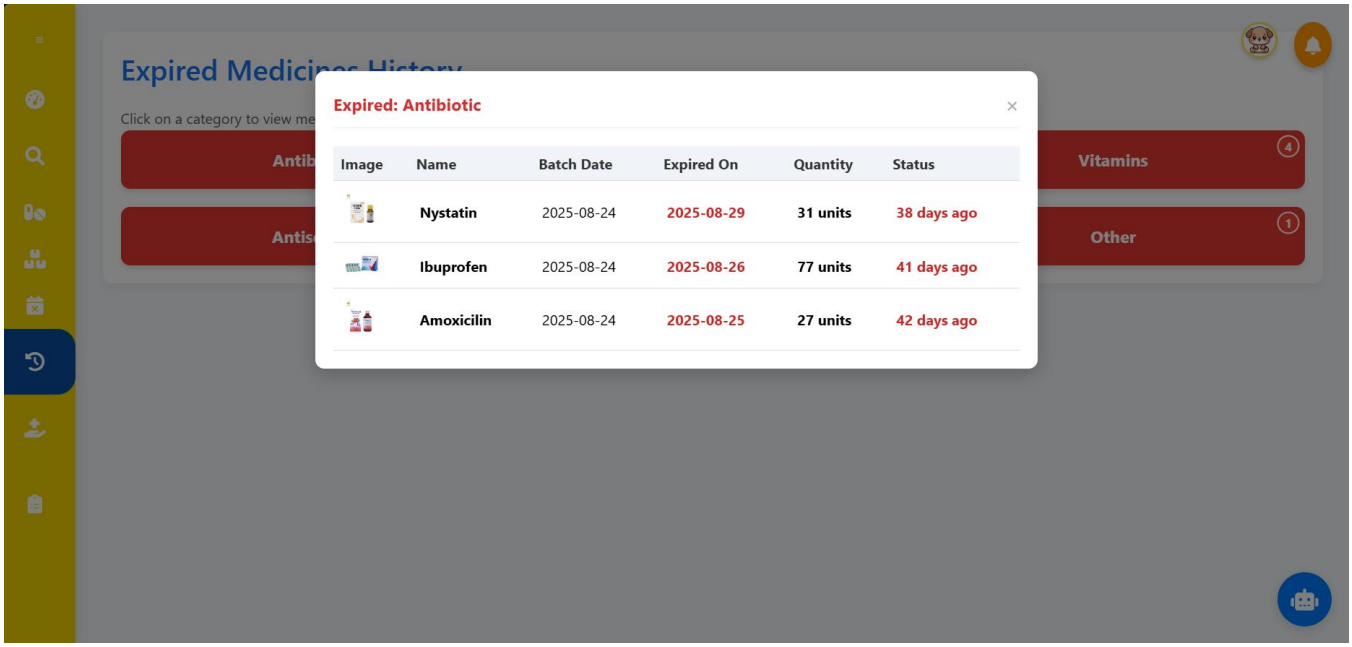

Fig 4.1.3 – Expired Medicines History Tab with alert notifications

4.3 Reporting

Users can generate different reports:

- ***Stock Report*** *– Current inventory details.*
- ***Expiry Report*** *– Medicines expiring soon or expired.*
- ***Waste Management Report*** *– Logs of donated, repurposed, or disposed medicines.*

Reports can be viewed on-screen or exported in ***PDF/Excel*** *format.*

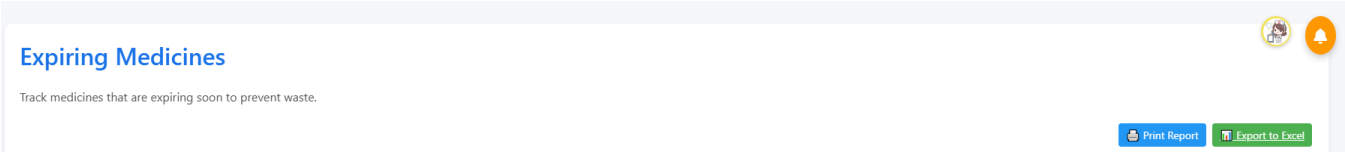

Fig 4.1.5 – Available pdf/excel file export for Expiring Medicines Report

4.4 Error Correction

- *If incorrect data is entered (e.g., wrong batch date), users may edit or delete the record.*
- *For database-related errors, only the Administrator can correct them.*

Note: Refer to Fig 3.4 – Medicine Inventory Tab

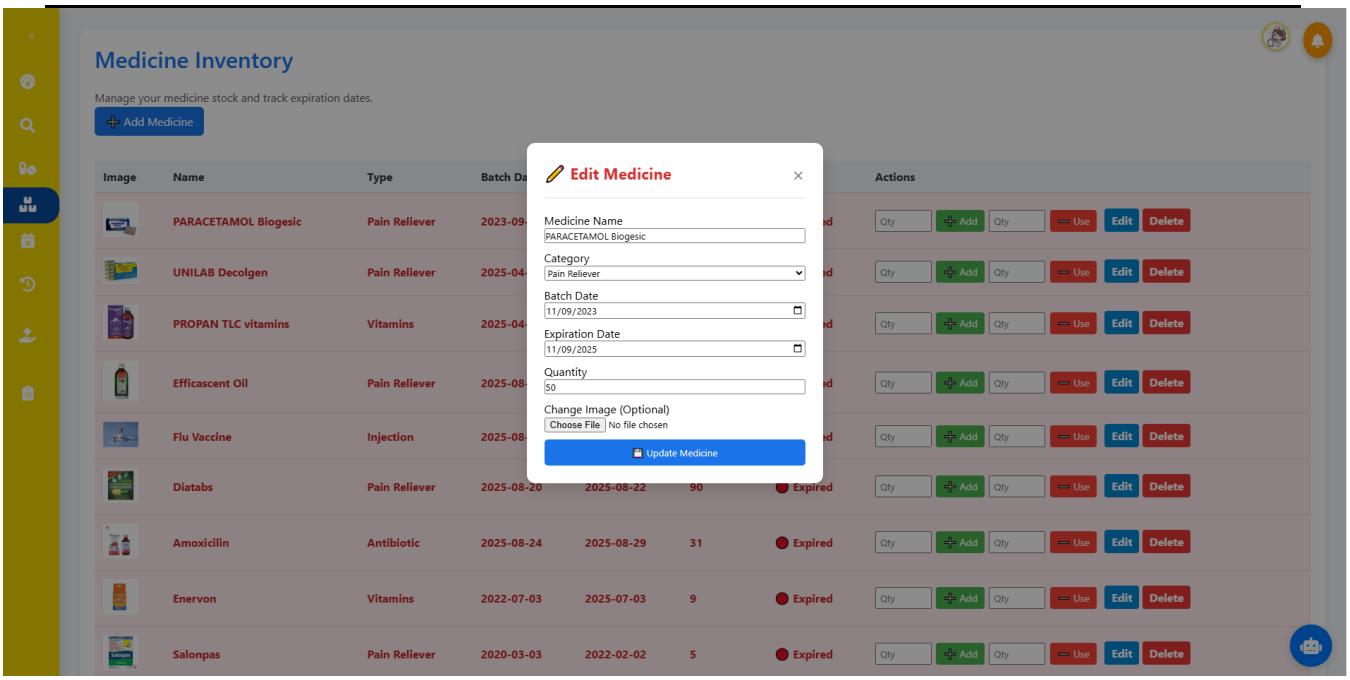

Fig 4.1.6 – Medicine Inventory Tab with Edit Function (including Delete button)

4.5 Caveats and Exceptions

- *Ensure that expiration dates are entered accurately; incorrect input may cause invalid alerts.*
- *Internet connection is required for real-time updates.*
- *Only authorized users should perform deletion of records to avoid data*
